

DAODU JOHNSON OLUWAFEMI

Fullstack Software Engineer

femiwebfullstack@gmail.com | +2349063932266 | Nigeria

LinkedIn: [linkedin.com/in/johnsonprofile](https://www.linkedin.com/in/johnsonprofile) | GitHub: github.com/techfbi | Portfolio: ojavy.vercel.app

PROFESSIONAL SUMMARY

Software developer with hands-on experience building, deploying, and securing production systems across web infrastructure, network-aware backends, and cloud platforms. I understand systems at both the application layer and the infrastructure layer; I have built authentication architectures from scratch, managed cloud deployments, configured rate limiting and session security, and diagnosed network and software faults in live environments. My CISCO certifications in networking and cybersecurity sit alongside practical work in application security, API hardening, Redis caching, and DevSecOps practices. I write clean code and I keep systems running. Whether I am troubleshooting a failed deployment, locking down an API endpoint, or helping a team debug a production incident, I bring the same careful, structured thinking to the problem.

TECHNICAL SKILLS

Systems and Networking: TCP/IP, IPV4/IPV6, DNS, HTTP/HTTPS, firewall concepts, VPN fundamentals, ethernet, routing, network troubleshooting, AWS VPC, subnets, network ACLs

Security: Application security, JWT with refresh token rotation, Argon2id hashing, Redis-backed rate limiting, OTP verification, token reuse detection, OWASP principles, security groups, cybersecurity fundamentals

Cloud and Infrastructure: Supabase, Vercel, Render, Cloudinary, AWS Cloud, Amazon EC2, Amazon S3, Amazon VPC, IAM, CloudWatch, Lambda, RDS, Well-Architected Framework, Cloud Security, Cost Optimization

Backend and APIs: Node.js, Express, TypeScript, RESTful APIs, GraphQL, OAuth 2.0, ESM modules

Frontend: React, Next.js, TypeScript, Tailwind CSS

Databases: PostgreSQL, MongoDB, Redis, DynamoDB

AI and Integrations: LLM integration, RAG pipeline design, Vision AI, prompt engineering

Tools: Git, GitHub, Postman, Figma, BullMQ, pgvector

PROFESSIONAL EXPERIENCE

IT Intern | *Vital Links, Osogbo, Nigeria* | August 2023 - December 2023

- Diagnosed software and network faults across workstations, resolved tickets, and performed routine system maintenance and updates to keep infrastructure stable.
- Collaborated with developers and designers to deliver application features on schedule, participating in code reviews and incorporating feedback from senior engineers.

Team Lead and Executive Director, Media and Branding | *TEDxFUTA and JCINFUTA* | 2022 - 2023

- Led the TEDxFUTA creative team in producing event awareness materials and visual identity assets that aligned with global TEDx brand standards, coordinating the full design pipeline from concept to print-ready delivery.
- Served as Executive Director of Media and Branding for JCINFUTA, directing brand identity development and event marketing campaigns, managing pixel-accurate digital creatives and ensuring consistent cross-platform visual communication.

PROJECTS

Within | *Node.js, TypeScript, Supabase, PostgreSQL, pgvector, BullMQ, OpenAI Embeddings*

Ongoing

- Identified hallucinated and generic AI responses as a problem and built a workspace based knowledge system that grounds answers strictly in users' uploaded documents.
- Built an asynchronous document pipeline using Supabase Storage and BullMQ to extract, chunk, embed with OpenAI, and batch store 1536 dimension vectors in PostgreSQL via pgvector.
- Built hybrid retrieval combining vector and full text search with Reciprocal Rank Fusion, passing top K chunks to the LLM for grounded, citation backed answers.

Flax | *React, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Redis, LLM* flax-ui.vercel.app

- Designed and shipped an end-to-end nutrition and hydration tracking platform from Figma wireframes to production, engineering a domain-scoped AI assistant that identifies meals from photos, estimates nutritional values, and answers questions using each user's health profile.
- Built a multi-provider AI vision pipeline with prompt grounding and fallback model logic to improve food recognition reliability, and a personalized recommendation engine that filters meal suggestions based on allergies, pantry inventory, and health goals.
- Implemented secure JWT authentication with refresh token rotation, reuse detection, and Redis-backed rate limiting to protect against session hijacking and brute-force attacks, alongside web push notifications and daily streaks. Beta users reported improved hydration habits and easier meal tracking.

Auth Gateway | *Node.js, TypeScript, Express, PostgreSQL, Redis, JWT*

GitHub: github.com/techfbi/Auth-Gateway | Docs: authgatewaydoc.vercel.app

- Built a reusable standalone authentication backend featuring refresh token rotation with family tracking and automatic reuse detection, HttpOnly cookie delivery, in-memory access token management, Argon2id password hashing, OTP-based email verification, Google OAuth with provider separation, and Redis-backed per-endpoint rate limiting.
- Wrote comprehensive developer documentation covering all endpoints, integration patterns, and security decisions, reducing the time a consuming team needs to safely integrate authentication from days to hours.

Favvy Song | *JavaScript, React, Node.js, Express.js, MongoDB, JWT*

GitHub: github.com/techfbi/full-stack-MERN-song-app | Live: favvy-song.onrender.com

- Built a full-stack MERN application with JWT access and refresh token authentication, a security-question-based identity verification flow for password recovery, protected routes, and CRUD functionality for personalized song collections. Deployed the frontend and backend independently on separate hosting environments.

EDUCATION

Bachelor of Technology in Information Technology | *Federal University of Technology, Akure, Ondo State, Nigeria* | September 2019 - October 2024

CERTIFICATIONS

AWS Cloud Practitioner | AWS: https://drive.google.com/file/d/1s0Z-wsaWhYe_rCoPfw9N3ikATfxSLFeR/view?usp=drivesdk

Full Stack Development Bootcamp | Udemy: <https://ude.my/UC-a3b3308e-15b9-4950-8f96-d2419d2a1970>

Introduction to Cybersecurity | CISCO: <https://www.credly.com/badges/abaaaab9-3a4a-424a-a2e2-fff843165150>

Networking Basics | CISCO: https://www.credly.com/badges/d2665890-3c4b-4c1a-8240-3df9cfadb3d7/public_url
